BRAND OVERVIEW

Founded in 2001, Fenix has developed into a China national high-tech enterprise, specializing in R&D, manufacturing and selling of mobile lighting tools, including flashlights, tactical lights, headlamps, bicycle lights, camping lanterns and lighting accessories. Fenix products are widely used in the following environments: outdoor sports, industrial, law enforcement, military, EDC (everyday carry), etc.

Fenix products are now being sold in more than 100 countries around the world, reaching tens of millions of users worldwide. Concentrating on the development of LED lighting tools of high performance and reliability, Fenix has won recognition and praise from users for its excellent products and service. Fenix has become known worldwide as a premium LED lighting brand based on each product's excellent performance and reliable quality.

The best design is derived from the actual needs of users. Fenix aims to satisfy customers' pursuit of versatile, mobile lighting products. With the mission of "Lighting For Extremes", Fenix is committed to becoming the world's No. 1 mobile lighting brand.

BRAND HONOR

WORLDWIDE SALES NETWORK

2005-2008

Fenix products entered the United States, Germany, Netherlands, Finland, Switzerland, Canada, Thailand, Denmark, Britain, Italy, France, Hong Kong, South Korea, Russia, Japan, Taiwan, Singapore, Malaysia, South Africa, Australia, etc.

2009-2013

Fenix products continued to expand the map, entering Saudi Arabia, Indonesia, Sweden, Norway, India, Czech Republic, Israel, UAE, Poland, Vietnam, Kazakhstan, Brazil, Spain and other markets.

Since 2014

Fenix products have been in more than 100 countries and regions around the world, and the sales network has achieved a global layout.

Fenix products are now being sold in many mainstream sales channels in domestic and overseas.

- REI - The world's largest outdoor chain channel.
- Grainger - The largest industrial chain channel in the United States. Dick's Sporting Goods - The largest outdoor chain channel in the United States. Sportsman's Warehouse - Outdoor sporting goods retailer. Galls - Leading chain store of public safety equipment and uniforms.
- Globetrotter - Germany's most influential outdoor chain channel. Frankonia - The largest hunting chain channel. MediaMarkt - The largest multinational chain of stores selling consumer electronics.
- MEC - Canada's largest outdoor chain channel.
- PARTIOAITTA - A well-known Finnish outdoor chain channel.
- Bever - The largest outdoor chain channel in the Netherlands.
- Tiexuejunpinxing - China's most well-known military product chain store. Sanfu Outdoor - the largest outdoor chain channel. Firefox Outdoor, Zhongjiahe Outdoor, etc.
- PROTrek - The largest outdoor chain channel in Hong Kong, China.

LIGHTING FOR EXTREMES

Harsh Environment Tests

Fenix products are tested in accordance with international ANSI standards. All products withstand more than 30 rigorous tests including high-strength water immersion, dust proofing, impact resistance, high and low temperature, etc. All these ensure that Fenix products can pass the tests of various conditions or harsh environments and provide users with secure and reliable lighting.

Drop test

In order to verify the performance of the product after a drop, 3-5 samples will be randomly selected to perform a 1.5-meter drop test on 6 sides*. After 6 drops, the product still needs to pass a waterproof test to ensure that the function of the tested product is not in any way hindered, and it must have no cracks or damage.

*The drop height for a flashlight is 1.5 meters, and for a headlamp 2 meters.

High and low-temperature test

In order to verify the high and low-temperature resistance of the product structure, 5 samples will be randomly selected and placed in a humidity cabinet for half an hour at -35°C, then it will be quickly transferred to an oven for half an hour at 70°C. This operation will be repeated 5 times. No damage to or deformation of the appearance and structure of the product must be visible for it to pass the test.

IPX8 waterproof test

In order to verify the waterproof performance of a product, 10 samples will be randomly selected and subjected to a drop test after being immersed in 2 meters of water for 30 minutes. After the test, the product is continuously immersed in 2 meters of water for 4 hours. Before and after the test the product must function normally and no water seepage must be evident for it to pass the waterproof test.

Switch press test

In order to verify the service life of product switches, 3 samples will be randomly selected of which the switches will be clicked a total of 10,000 times. After the test, the product must function normally, with good hand feeling and sensitivity, and a normal clicking of 2 times per second qualifies it to pass this test.

LIGHTING FOR EXTREMES

The Ultimate Pursuit Of Technological Innovation

Fenix always pursues advanced industry technology and constantly creates innovative lighting products. So far, we have hundreds of technology patents that are widely used in various lighting products, from a mini keychain flashlight to a sturdy headlamp, which can all confirm Fenix's firm footsteps in exploration and innovation.

01

INNOVATIVE APF TECHNOLOGY SYSTEM MAKES SUPER TACTICAL FLASHLIGHT

Fenix's innovatively developed APF Technology System* uses a single layer to achieve simultaneous transmission of working current and signals control, completely breaking the shackles of the tactical flashlight by the tail switch, while still achieving the tactical requirements and applications for flashlights, such as small size, high brightness, and anti-interference.

Utility Model Patent **ZL 201920500579.6**

Brightness bottleneck breakthrough

The brightness is no longer limited by the current withstand capability of the tactical switch, easily reaching or even exceeding 3000 lumens, giving full play to the advantages of LEDs.

Smaller light size and more battery compatibility

The single-layer body and single-polarity battery are used to complete current transmission and signal control, making smaller light sizes and more battery use possibilities.

Anti-interference

Complex external environments such as strong magnetic fields are easily dealt with through stronger anti-interference ability, so the flashlight can be used with confidence.

Multifunctional combination

Through the pulse-frequency transmission system, it makes the multi-switch and multi-function combination of tactical operation and output selection can be achieved.

* The APF (Advanced Pulse-frequency Transmission System) was developed by Fenix Laboratory for producing better flashlights. This has allowed the abandonment of traditional development by breaking through the technology bottleneck, allowing the flashlight with a tail switch to achieve a higher level of performance.

02

UOL - ULTRA - THIN OPTICAL LENS

Fenix's first 3.5mm UOL (Ultra-thin Optical Lens), adds an aluminum-silicon reflective coating to the unique lens structure, to accomplish the reflection and double refraction of the light emitted by the light source. This design makes a slimmer lens possible.

In addition, compared with the conventional 10mm lens, the UOL can produce better light efficiency and successfully reduce the volume and weight of the flashlight, while making the flashlight more portable and convenient to use.

Utility Model Patent ZL 201820183805.8

FARTHER

With the same thickness, the ultra-thin optical lens has an 86% increase in beam distance when compared with conventional lenses.

THINNER

With the same beam distance, the thickness of the ultra-thin optical lens is about 60% thinner than the conventional lenses.

03

IOP - INTELLIGENT OVERHEAT PROTECTION

LED flashlights mostly use high-power LED light-emitting bodies with batteries. In order to meet lighting needs, they often use high-power constant circuit output to supply power. However, due to the small size of the flashlight, long-term high-power lighting will cause the flashlight to become very hot, resulting in the risk of burns.

To overcome this problem, Fenix has created the IOP (Intelligent Overheat Protection). This system applies an integrated circuit system that limits the maximum current input and controls the real-time temperature, which allows the flashlight to automatically reduce its power when the temperature is too high, and to achieve intelligent cooling, thereby protecting the user, reducing safety risks, and relatively extending the runtime for longer lighting*.

Utility Model Patent ZL 201821879647.6

Not burning if less than 60°

When the surface of the flashlight reaches the warning temperature before 60°, the IOP will be activated to ensure that the surface of the flashlight will not exceed 60°, and there will be no obvious feeling of hotness.

Sensitive and self-control

Without intervention, after the surface temperature of the flashlight decreases, the power and brightness will be automatically restored.

*Longer lighting means that when the power is automatically reduced under high-temperature conditions, the power consumption is reduced, so the lighting time is relatively increased.

04

SPORT SECURE PERFORMANCE FOR OUTDOOR RUNNING AND TRAIL HEADBAND FIT SYSTEM

Headlamps are essential outdoor gear. In addition to brightness, runtime and waterproofness, simple and quick adjustment of the headband is also a primary concern for most users. The traditional headband uses a buckle to adjust the length, and it is extremely inconvenient to use as both hands are needed to adjust the headband.

Fenix has now broken the limitation of conventional headband adjustment by applying the SPORT Fit System to the headband adjustment, which has been the perfect solution to this problem. The SPORT Headband Fit System is fitted with a button structure. The length of the headband can be adjusted by rotating the button to tighten/loosen the pulling rope fixed on the headband, which provides convenient and flexible adjustment of the headband with a single hand while being active.

Utility Model Patent ZL 201922003670.X

One-handed adjustment while running

During trail running, the headband will inevitably loosen and fall due to bumpy and changing road conditions, resulting in changes in lighting angles, so the original intention of the single-handed design is to effectively ensure the runners' stride and safety, thus making sure every second counts and every step comforts.

Press and rotate

Just push and rotate the button to adjust the length of the headband. The New SPORT Headband Fit System couldn't be more perfect to adjust the headband with a single hand while running.

APPLICATION SCENARIOS

Fenix products include flashlights, tactical lights, headlamps, bicycle lights, camping lanterns and lighting accessories, which are widely used in the following environments: outdoor sports, industrial, law enforcement, military, EDC (everyday carry), etc. Fenix aims to satisfy customers' pursuit of versatile, mobile lighting products with the mission of "Lighting For Extremes".

FENIX EDC (EVERYDAY CARRY) SERIES products are deeply loved by thousands of users for the compact size, stylish appearance, applicable brightness, and practical functionality. In addition, the excellent resistance to water and impact makes the EDC light an indispensable helper in everyone's daily lighting.

E18R **V2.0**

HIGH-PERFORMANCE EDC FLASHLIGHT

The Fenix rechargeable E18R V2.0 is a high-performance flashlight in an ultra-compact, everyday carry design. This flashlight produces a maximum of 1200 lumens with a useful beam of 146 meters. Powered by an included ARB-L16-700P rechargeable Li-ion battery, this flashlight is fully rechargeable via its USB Type-C charging port. A convenient side switch activates all lighting modes and includes a battery level indicator - helping you always know the status of your battery. The magnetic base facilitates hands-free use for attaching the light to most metal surfaces. Waterproof and dustproof, the Fenix E18R V2.0 can handle more than just around-the-house tasks. A reversible pocket clip keeps the light secure whether you prefer bezel-up or bezel-down storage/carry. Take this flashlight on a hike, use at work, or keep it in care for emergencies. The E18R V2.0 is a great everyday carry light that can do much more.

| **SIZE:** 5.43" x 1.10" x 1.10" / 138 x 28 x 28 mm
 | **WEIGHT:** 6.00 oz / 170 g (including battery)

Fenix E-CP is a rechargeable outdoor flashlight with a power bank function. It has a built-in 5000mAh large-capacity battery to ensure longer runtime, and it can be used as a power bank for charging small digital products such as mobile phones. Featuring IP68 protection, it can be used in harsh outdoor environments.

E-STAR PORTABLE SELF-POWERED EMERGENCY FLASHLIGHT

	IP24
	1300mAh/1xAA

- 100** lumens
- 40** meters
- 120** hours

- Single-handed power generation.
- Built-in super capacitor, light can be used even if without battery, no need to constantly press the handle.
- Made of ABS engineering plastics, in line with ergonomic industrial design.
- Supports USB Type-C charging, easily be charged by external devices.

The Fenix E-star is a portable self-powered flashlight for emergencies, including areas lacking stable power supply and disaster-hit areas; as PSK/BOB gear, also it can be used as a backup flashlight for extended outdoor activities. The flashlight allows use while charging, a single-handed pressing for power generation, which is easy even for long-time operation. Another power supply comes from the included low self-discharge Ni-MH battery, a common AA battery can be used as well. And the flashlight supports USB Type-C charging, with the built-in supercapacitor, it helps with energy storage and buffering when the battery is damaged or missing.

| **SIZE:** 5.31" x 2.09" x 0.94" / 135 x 53 x 24 mm
 | **WEIGHT:** 4.52 oz / 128 g (including battery)

PEN-SHAPED WORK LIGHT

■ Fitted with warm white LED - effective in medical inspections and daily lighting.

■ Clear anti-counterfeit watermark is visible under 365nm UV light.

■ The light head and tail switch are made of stainless steel which effectively avoids scratches, and gives the penlight a unique metal texture appearance.

LD Series

Oriented towards the outdoor professional, Fenix develops its LD series flashlight with an exquisite and compact design, which lessens the volume and reduces weight to the largest extent. With various output levels and a flashing function, the Fenix LD models can satisfy your various lighting needs, making them the preferred quality lighting devices for those highly difficult professional outdoor sports activities.

LD02 V2.0 DUAL LIGHT SOURCES EDC PENLIGHT

LR80R

SUPER BRIGHT HAND-HELD SEARCHING FLASHLIGHT

The Fenix LR80R is the definition of a super bright handheld searchlight. The flashlight will impress everyone with an outstanding 18000 lumens powered by the built-in 7.2V/12000mAh Li-ion power battery pack. Capable of 1130-meter beam visibility, it can be used to find any object in the dark. The dual switch design allows you to quickly enter high and low-brightness modes. With the built-in USB Type-C charging port you can fast charge the Fenix LR80R in a matter of hours, or use the discharge function to charge your other devices. A unique and user-friendly brightness downshifting sensor function is designed to avoid high temperatures at close-range lighting. You can easily carry the LR80R with the detachable handle or use the tripod socket for outdoor photography. Battery level indicators will tell you when it's time to charge the LR80R with the included charging cable. This powerful flashlight can serve multiple purposes, including search and rescue missions.

LR60R MECHANICAL ROTARY SEARCHING FLASHLIGHT

	IP68
	1x16340/1xCR123A

The Fenix HM50R V2.0 is a rechargeable dual-purpose headlamp. One 16340 rechargeable Li-ion battery is included or you can use one CR123A lithium battery to power it. This headlamp is power-packed throwing a 700 lumens beam to a maximum distance of 115 meters. The HM50R V2.0 is outstanding with its solid construction and lightweight size, plus it is detachable to be used as a mini flashlight. This rechargeable headlamp combines white and red lights, comes with a USB Type-C charging cable and features an IP68 rating, all of which make the Fenix HM50R V2.0 perfect for camping, hiking or working in rigged environments.

HM60R

INTELLIGENT FREQUENCY-SENSING OUTDOOR HEADLAMP

The Fenix HM60R is an intelligent outdoor headlamp that provides ultra-long runtime. Featuring spot- and floodlights, the headlamp is excellent both in long-distance and wide-angle lighting. With the use of frequency-sensing brightness technology, the headlamp changes its brightness to adapt to different activities. As the user's step frequency increases or decreases the brightness will gradually increase or decrease accordingly, which makes it truly intelligent for high-intensity trail running. A hidden USB Type-C fast charging design is used, a 54-hour runtime mode is considered for hiking, it is an excellent choice for long-term, high-intensity trail running.

ONE CHARGING FOR 100KM RUNNING

As more and more running lovers participate in trail running races, the requirements for headlamps are becoming more and more stringent. The Fenix HM65R is highly praised by trail runners due to its high performance and long runtime. The slogan "One charging for 100km running " is therefore widely spread.

In the meantime, Fenix has listened to the opinions of the users and then we have the upgraded version HM65R-T. On the basis of brightness improvement and battery life, the headlamp is more comfortable to wear with the top headband removed. Especially the NEW SPORT Headband Fit System. It couldn't be more perfect to adjust the headband with a single hand while running.

Utility Model Patent ZL 202022806700.3

SIZE: 4.13" x 1.81" x 1.77" / 105 x 46 x 45 mm
 WEIGHT: 7.32 oz / 207.5 g (including battery)

The Fenix HM71R is a high-performance rechargeable headlamp for industrial lighting scenarios which includes a magnetic base and belt clip for continued hands-free use. Combined spotlight and floodlight, the HM71R headlamp has four lighting modes with a max output of 2700 lumens. Powered by a high-capacity 21700 battery, this light can emit light for up to 400 hours. With a battery level indicator, IP68-rated waterproof and dustproof, and impact-resistant to 2 meters. This excellent headlamp is the ultimate hands-free lighting tool for extended work.

HP Series

Taking full advantage of modern lighting technology and creative design, Fenix successfully develops the HP series headlamps with outstanding performance. By using a metal housing and constant brightness regulating circuit, Fenix's HP series produces much brighter beams and offers more functions, longer runtime and better durability than competitors. With IP66 ratings, the Fenix HP models will satisfy your various lighting needs whether searching and rescuing, caving, cycling, mountaineering and hiking, etc.

HOT

HP16R

HIGH-PERFORMANCE RECHARGEABLE OUTDOOR HEADLAMP

The Fenix HP16R is a rechargeable high-performance outdoor headlamp. The spot- and floodlight can be used simultaneously or separately to deliver a max output of 1250 lumens, runtime of 300 hours. The HP16R is a headlamp with a separate battery case, powered by the included Fenix ARB-LP3000 Li-polymer battery pack or the headlamp can also run on 4 Ni-MH/Alkaline AA batteries. The HP16R will be an indispensable aid in your mountaineering, searching, snow-hiking or any other challenging outdoor activities.

HP25R V2.0

RECHARGEABLE WORK HEADLAMP WITH ULTRA-LONG RUNTIME

The Fenix HP25R V2.0 is a rechargeable work headlamp that provides an ultra-long runtime of 400 hours on low mode. Powered by its included 5000mAh Li-ion battery, this headlamp can blast a combined 2000 lumens from the independently controlled spotlight and floodlight. There is a separate battery case located on the headlamp's rear; this unique battery case includes a USB Type-C charging port for easy and fast charging. For all-night exploring or work demands, the Fenix HP25R V2.0 headlamp never fails you.

HP30R V2.0

ULTRAHIGH-PERFORMANCE SEPARATE SEARCH&RESCUE HEADLAMP

The upgraded version Fenix HP30R V2.0 employs power and versatility as a rechargeable high-performance separate headlamp. The power comes from the two included 21700 rechargeable batteries that allow for extended runtime in an easy-to-recharge case with the unique ability to also charge your other digital devices as a power bank. The versatility of this headlamp begins with the belt-worn battery case that allows for a lightweight and comfortable design on the head. The versatility continues with 4 levels of spotlight and 3 levels of soft floodlight. The HP30R V2.0 can be a life-saving tool to search and rescue professionals; its excellent functionality makes it ideal for adventurers at all levels as well.

Integrated die-casting for security and better heat dissipation.

The rotary switch simultaneously activates spot- and floodlight modes.

Dual interface for charging and discharging capability.

Dual wearing way of battery case; can be clipped on the headband or can be belt-worn.

CL28R

MULTIFUNCTIONAL OUTDOOR LANTERN

The Fenix CL28R outdoor lantern certainly is a versatile powerhouse that brightly illuminates entire rooms and charges other electronic devices at the same time. You are provided with a maximum of 2000 lumens which portrays light at a 58 meters distance. This lantern features two rotary switches that enable stepless brightness adjustment of both white and red lights. This rechargeable lantern has a USB-C charging port to charge the built-in 10000mAh batteries and USB-A / USB-C discharging ports to charge your phone, speaker or tablet. Additional advantages include a 360° rotary light handle for all-around lighting, IP66-rated protection and red alerting flashing. You can attach the Fenix CL28R to a tripod or hang it. This versatile lantern is great for car camping, rustic cabin stays, and even power outages.

CL30R

HIGH-PERFORMANCE CHARGING AND DISCHARGING CAMPING LANTERN

The Fenix CL30R rechargeable camping lantern offers flexibility in power, charging and brightness levels. This versatile lantern not only features a Micro USB port for recharging, but it is the first Fenix lantern that serves as an independent charging station for other devices. The powerful CL30R delivers a maximum output of 650 lumens, which illuminates an area 35 meters in diameter. Powered by one, two or three 18650 rechargeable batteries, this lantern offers five brightness levels, Turbo and Flash. The CL30R features a cold-resistant battery compartment for all-season use, charging and battery-level indicators for accurate operation, and a hanging lanyard and tripod socket for flexible lighting options.

ALF-18 (Battery Holder)

The Fenix 18650 Li-ion battery can be used as a 21700 Li-ion when combined with this battery holder.

- PC + ABS materials - reliable and durable.
- Copper - plated positive contact - excellent performance in conductivity.
- Size: 2.41" x 0.85" / 61.2 x 21.5 mm.
- Weight: 0.22 oz / 6.1 g.

Chargers

Fenix provides different kinds of multifunctional chargers for various battery types. Which all feature readable charging indication, and are guarded with multiple protection that effectively prevents overcharging and short circuit.

ARE-A2 Dual Channel Charger

Fenix ARE-A2 is a dual-channel charger, which is compatible with different types of Li-ion and Ni-MH/Ni-Cd batteries. High-definition LCD screen displays charging status and battery level clearly. In addition, a car charging mode offers high convenience for users.

- LCD display screen for charging and battery level.
- Compatible with different types of Li-ion and Ni-MH / Ni-Cd batteries.
- AC and DC charging modes.
- To charge the battery: 4.2V/1.0A (Li-ion), 1.5V/1.0A (Ni-MH/ Ni-Cd).
- Rated output power: 3W (Ni-MH/ Ni-Cd), 8.4W (Li-ion).
- Built-in short-circuit protection, over-current protection, over-voltage protection and reverse polarity protection.

ARE-A4 Multifunctional Charger

Fenix ARE-A4 is a four channels smart charger, which is compatible with different types of Li-ion and Ni-MH/Ni-Cd batteries. High-definition LCD screen displays charging status and battery level clearly. In addition, a car charging mode offers high convenience for users.

- LCD display screen for charging and battery level.
- Compatible with different types of Li-ion and Ni-MH / Ni-Cd batteries.
- AC and DC charging modes.
- To charge the battery: 4.2V/1.0A (Li-ion), 1.5V/1.0A (Ni-MH/ Ni-Cd).
- Rated output power: 6W (Ni-MH/ Ni-Cd), 16.8W (Li-ion).
- Built-in short circuit protection, over-current protection, over-voltage protection and reverse polarity protection.

ARE-D1 Single Channel Multifunctional Charger

Fenix ARE-D1 is a single channel smart charger that features charging and discharging functions. It is compatible with types of Li-ion and Ni-MH/Ni-Cd batteries. High definition LCD screen displays the charging, discharging and battery status clearly.

- Micro USB charging, and USB discharging.
- LCD screen for battery level, charging and discharging status.
- 0.5/1.0/2.0A - three charging current for option.
- Rated output power: 3W (Ni-MH/Ni-Cd), 8.4W (Li-ion).
- Short circuit protection, over-current protection, over-voltage protection and reverse-polarity protection.

ARE-D2 Dual Channel Multifunctional Charger

Fenix ARE-D2 is a dual-channel smart charger that features charging and discharging functions. It is compatible with types of Li-ion and Ni-MH/Ni-Cd batteries. High definition LCD screen displays the charging, discharging and battery status clearly.

- Micro USB charging and USB discharging.
- LCD screen for battery level, charging and discharging status.
- 0.5/1.0/2.0A - three charging current for option.
- Rated output power: 3W (Ni-MH/Ni-Cd), 8.4W (Li-ion).
- Short circuit protection, over-current protection, over-voltage protection and reverse-polarity protection.

ARE-X1 V2.0 Single Channel Smart Charger

The Fenix ARE-X1 V2.0 is a single channel smart charger that features USB Type-C charging and USB discharging function, designed for 18650, 21700 and 26650 batteries, and provides charging, discharging, and battery power detection.

- Compatible with one 18650, one 21700 or one 26650 rechargeable Li-ion battery.
- Supports USB Type-C charging and USB discharging.
- LED charging/discharging indicator; LED battery power detection.
- Short circuit, over-current, over-voltage and reverse polarity protection.
- Microcomputer chip controlled, digitally regulated charging to extend battery life.

Diffuser Tip /Filter Adapter /Traffic Wand

NEW

AOD-S V2.0/AOD-M Diffuser Tip

Diffuser tips can soften the light and work as a camping light, signal light, reading light, tent light, etc.

- Durable, impact-resistant and fireproof to V2 Standard.
- Easy operation.
- Imported novel optical material guarantees quality.

AOF-S+/AOF-M Filter Adapter

This is a Fenix flashlight accessory with outstanding filtering ability to maintain strong red/blue/green light which can be used when signaling.

- Uses a toughened ultra-clear glass lens with an anti-reflective coating that provides heat resistance and maximum light penetrability.
- Germany's Bayer PC 2805 material, aging and impact resistant.
- Anti-roll design, easy to assemble and disassemble.

AOT-S+/AOT-M Traffic Wand

Fenix traffic wand can convert your flashlight into a glowing orange high-visibility wand. It's the best option for emergency situations and traffic control.

- German Bayer PC2805 material.
- High compressive strength, impact resistance.
- High-temperature resistance and benign thermal stability.
- Easy to assemble and disassemble.

Tactical Accessories

The Fenix tactical accessories enhance your tactical flashlight's capabilities for any tactical situation.

AER-02 V2.0 Tactical Remote Pressure Switch

The Fenix AER-02 V2.0 remote pressure switch is specialized in tactical flashlights. The dual tail switches allow easy and fast operation of momentary-on or constant-on illumination (function may vary with flashlights).

- Tactical tail switch (round) for instant or constant activation.
- Noiseless (no click) pressure pad switch (30mm long), which is more accurate in instant lighting, with a lifespan of 100,000 activations; capable of transmitting a current of 3A for a long period of time.
- User-friendly Velcro design for fast and convenient operation, included one hook and two loops.
- Cable is made from resilient PU material, with a length of 23 cm.
- Tail adapter is made from T6-grade aluminum, type III hard-anodized and an anti-abrasive finish.
- Tail adapter size: 25.4mm Diameter x 31.5mm Length.
- IP68-rated protection: 2 meters underwater
- Applicable to Fenix 18650-powered flashlights with a single tail switch.

AER-03 V2.0 Tactical Remote Pressure Switch

The Fenix AER-03 V2.0 remote pressure switch is specialized in tactical flashlights. The dual tail switches allow easy and fast operation of momentary-on or constant-on illumination and output selection (function may vary with flashlights).

- Tactical Remote Pressure Switch.
- Tactical tail switch (round) for instant or constant activation.
- User-friendly Velcro design for fast and convenient operation, included one hook and two loops.
- Cable is made from resilient PU material, with a length of 23 cm.
- Tail adapter is made from T6-grade aluminum, type III hard-anodized and an anti-abrasive finish.
- Tail adapter size: 26.5mm Diameter x 32mm Length.
- IP68-rated protection: 2 meters underwater.
- Applicable to Fenix 18650-powered flashlights with dual tail switch.

AER-04 Remote Pressure Switch

The new Fenix AER-04 remote pressure switch is specialized in tactical flashlights using 21700 battery. Its tail adapter is made of A6061-T6 aluminum with type III hard-anodized and anti-abrasive finish. The dual tail switch panel includes a full-silent forward switch and a tape switch; allowing easy and fast operation of momentary-on or constant-on illumination. The innovative full-silent design with attached Velcro makes it very reliable and practical in your tactical missions or hunting.

- Tail adapter diameter: 1.14" / 29mm.
- Applicable thread: Tr25.5 x 0.06" / 1.5 mm.
- Cable length: 9" / 230 mm.
- Full length: 13.39" / 340 mm.
- Weight: 1.48 oz / 42 g.

AER-05 Remote Pressure Switch

The Fenix AER-05 remote pressure switch is specialized in tactical flashlights with APF circuits. Its tail adapter is made of A6061-T6 aluminum with type III hard-anodized and anti-abrasive finish. The dual tail switch panel includes a silent pressure pad switch and a round tactical switch; allowing easy and fast operation of momentary-on or constant-on illumination. The innovative full-silent design with attached Velcro makes it very reliable and practical in your tactical missions or hunting.

- Tail adapter diameter: 1.14" / 29 mm.
- Full length: 13.4" / 340 mm.
- Applicable thread: Tr25.5 x 0.06" / 1.5 mm.
- Weight: 1.48 oz / 42 g.
- Cable length: 9" / 230 mm.

NEW

ALG-15 Rail Mount

The ALG-15 rail mount can fit a flashlight with a head diameter of less than 40mm and a body diameter of 22.5-26mm on the Picatinny rail (MIL-STD-1913), making quick disassembly and assembly possible by means of a screw nut.

- Fits multiple flashlights with different body diameters.
- Quick-release mounting.
- Compact and lightweight.
- Durable and wear-resistant material.
- Size: 3.03" x 1.18" x 1.22" / 77 x 30 x 31 mm.
- Weight: 1.66 oz / 47g.

NEW

AER-06s Remote Pressure Switch

The Fenix AER-06s is a revolutionary control device for weapon-mounted electronic accessories. Shared USB Type-C port with GL19R, AER-06s has successfully reinvented how you interface with your GL19R. With the design of a single electronic switch, this remote button is ergonomically inclined at a 45-degree angle, which can realize functions such as momentary on, constant on or strobe, and supports activation of the highest brightness of the flashlight. At the same time, it has an IPX6 protection level regardless of battle environments. MIL-STD-1913 rail adapter base is included as standard, and the M-Lok rail adapter base is also attached as an accessory. There are two types of bases for you to choose from.

- Size with MIL-STD-1913 rail adapter base: 1.50" x 1.34" x 1.10" / 38 x 34 x 28 mm.
- Size with M-Lok rail adapter base: 2.05" x 0.83" x 0.63" / 52 x 21 x 16 mm.
- Cable length: 7.87" / 200 mm.
- Weight with MIL-STD-1913 rail adapter base: 1.43 oz / 40.6 g.
- Weight with M-Lok rail adapter base: 1.11 oz / 31.4 g.

ALG-16 M-LOK Quick-release Rail Mount

The ALG-16 M-LOK quick-release rail mount can fit the flashlight with a head diameter of less than 40mm and a body diameter of 22.5-26mm on the M-LOK rail, making quick disassembly and assembly possible by hand.

- Fits multiple flashlights with different body diameters.
- Quick-release mounting.
- Compact and lightweight.
- Durable and wear-resistant material.
- Size: 1.85" x 1.65" x 1.18" / 47 x 42 x 30 mm.
- Weight: 1.76 oz / 50 g.

ALG-00 Rail Mount

ALG-00 features the quick detachable Picatinny rail design which suits tactical firearms with fish oil Picatinny rails. The compatible flashlight diameter ranges from 22.5-26mm, and a wrench is needed when clipping flashlights. Full-metal housing made of durable aircraft-grade aluminum, and premium type III hard-anodized anti-abrasive finish in all-black treatment without light reflection.

ALG-18 Rail Mount

The Fenix ALG-18 rail mount is a functional accessory that helps to perform tactical/hunting applications; which suits weapon barrels ranging from 18 - 22mm. The compatible flashlight body diameter ranges from 23.5 - 28mm with a light head diameter of less than 70 mm. Made of durable and high-strength aluminum, the easy operation effectively assists in tactical/hunting scenarios.

- Allows for quick assembly and disassembly of the gun barrels.
- Tool-free assembly and disassembly.
- Fits a variety of barrel dimensions.
- Size: 2.99" x 1.81" x 1.37" / 76 x 46 x 35 mm
- Weight: 3.10 oz / 88 g

ALG-05 Tactical Remote Pressure Switch Mount

The Fenix ALG-05 tactical remote pressure switch mount is specially designed for Fenix AER series tactical remote pressure switches. It perfectly fits the Picatinny rail by a simple push; featuring convenient assembly and disassembly, the mounting position can be flexibly adjusted. Designed specifically for tactical lighting, the remote pressure switch is within easy reach, so the flashlight can be momentarily switched on with a press of the button. The whole body of the mount is made of aluminum alloy with hard-anodized finish, and it is not reflective in matte black, which meets the needs of tactical concealment.

ALP-10S/10L Flashlight Holster

The Fenix ALP-10 is a holster that is specifically designed for packing and protecting flashlights. The use of anti-tear nylon material features excellent abrasion resistance. Three layers of different materials are used, with one-time hot pressing, which is stylish and durable; the back webbing is designed with a combination of Velcro and nickel-plated metal button, ensuring strong stability and quick-release ability. The holster can be perfectly matched with the belt, backpack, and more. In this way, the flashlight is fully protected in a variety of scenarios such as law enforcement, outdoor lighting, searching and rescuing, etc.

- The use of anti-tear nylon material features excellent abrasion resistance.
- Strong stability and quick-release ability.
- Stylish and durable.

ALG-06 Tactical Remote Pressure Switch Mount

The ALG-06 tactical remote pressure switch mount can adapt the AER-02/03/04/05 remote pressure switch to the M-LOK rail, which is lightweight, and reliable.

- Lock fixation ensures no displacement.
- All-metal housing.
- Size: 2.72" x 0.94" x 0.39" / 69 x 24 x 10 mm.
- Weight: 0.85 oz / 24 g.

NEW

T6 Automatic Retracting Tactical Pen

The Fenix T6 is a multifunctional self-defense tactical pen that is capable of illuminating, window breaking and writing. Its maximum brightness reaches 80 lumens, and it supports Type-C charging. This tough pen features a zirconium bead that can break glass and assist in escape from danger. Inside every pen is an imported Schmidt pen cartridge for smooth, effortless writing. As you can expect, this rugged, high-performance writing tool is tough enough to provide you with a tactical advantage in emergency situations.

- Removable Schmidt 6.8CM metal pen refill for self-defense.
- Automatic retracting ink tip for smooth writing.
- Made of A6061-T6 aluminum.
- Premium type HAIII hard-anodized anti-abrasive finish.

NEW

ALR-01 Tactical Flashlight Ring

ALR-01 tactical flashlight ring provides users with a convenient and flexible flashlight operating experience to meet various holding needs. The ring is easy to disassemble and assemble. It is made of high-strength nylon. There are design grooves on both sides, which helps the belt clip find a suitable position. The raised finger tigers provide a force point for the fingers and can also be used as a strike point and a pressure point.

- Applicable products:
TK Series :TK16 V2.0/TK20R V2.0/TK22 TAC/TK30
PD Series :PD36R Pro

NEW

ALP-20 Quick-pull Holster

ALP-20 is a quick-pull leather case for duty flashlight. The whole is made of full-grain cowhide with a thickness of 3mm. The flashlight will not loosen after being inserted; it is a close-fitting concealed flashlight cover that is very suitable for casual clothes. Wear firmly, the flashlight will not shake even when running and under strenuous exercise. Body and thigh squeeze of the holster will not trigger the switch, and it is excellent to prevent accidental touch. It is recommended to use a 4 cm wide inner belt, or a nylon tactical inner belt, which is compatible with a maximum 55mm duty belt.

- Applicable products:
TK Series :TK22UE/TK16 V2.0/TK20R V2.0 /TK30
PD Series :PD36R/PD40R

Headband /Fanny Pack /Storage Bag

This is a series of accessories designed for outdoor activities such as running, all perfectly fit the body, and show a sense of sports fashion.

AFH-10 Sports Headband

The Fenix AFH-10 is a high-elastic quick-drying sports headband, made of air-permeable nylon fabric. The sweat-channeling silicone lines, reflective logo and lines make night activities safer.

- 70% nylon, 30% spandex - high-elastic and air-permeable.
- Sweat-channeling silicone lines.
- Safe reflective logo and lines.
- 4 colors for options: black, gray, blue, orange.

APB-20/ABP-30 Headlamp Storage Bag

- Made of high-strength nylon cloth - lightweight and wear-resistant properties.
- Increased and large storage space, inner mesh cloth bag - enough for headlamp and battery storage.
- 50mm long lanyard.
- High-strength zipper.
- Applicable headlamps: HL10, HL12R, HL15, HL16, HL18R, HL23, HL26R, HM61R, HM65R, etc.
- 1000 times cycle use; 1-year free repair, lifetime limited warranty.

NEW

GS10 Gun Safe Box

Fenix Gunsafe 10 is a gun safe box with multiple unlocking methods. The main structure is made of high-thickness SPCD steel plate, which is sturdy and reliable, and is resistant to falling and smashing. The inner spring structure design can not only quickly switch the box without pinching hands, but also enhance the safety of the safe box. It also has a retractable handle design, three unlocking methods and an independent internal lighting system.

- Fingerprint lock, touch key lock, mechanical lock three unlocking methods.
- There is a Type-C charging port outside the box and a built-in 5000mAh Li-ion battery.
- With 3-5 lumens lighting function in the box, it lights up when open the box and goes out when it is closed.

Mount /Hook /Lanyard

The multifunctional mount and hook accessories provide more use patterns for all products. with flexible assembly ways.

AFB-10 Sports Fanny Pack

The Fenix AFB-10 is a waterproof sports fanny pack with a large storage capacity. It features an adjustable waist strap and cross-shaped headphone hole, making running more enjoyable. In addition, a reflective logo ensures safer night running.

- Folded and tensile design, the storage capacity of the pack can be extended.
- The inside is TPU waterproof layer, plus a waterproof zipper, all of which makes the pack resistant to water and sweat.
- Hidden hole for headphone usage.
- High-elastic adjustable belt for a closed and personal fit.
- Reflective Fenix logo ensures safer night outdoors.
- 4 colors for options: black, gray, blue, orange.

AFH-02 /AFH-03 Sports Headband

- Made of high-elastic and air-permeable nylon.
- Sweat-channeling silicone lines.
- Safe reflective logo and lines.
- Hollow design - breathable and comfortable.

ALB-10 Quick-release Bicycle Mount

Utilizing a unique split-type design for quick release of flashlights, the Fenix ALB-10 bicycle mount can effectively reduce the amount of steps and the time needed for mounting. Featuring Fenix's solidity and compatibility with a wide range of flashlights, this mount will ensure your safety during your night riding.

- Split-type design for quick release.
- Fits flashlights with a diameter of 18mm - 26mm.
- Rotating 30-degree design adjusts to any locking angle.
- A high-quality rubber mat provides shock-resistant and slip-resistant grip without scratching the handlebar.
- Anti-aging, solid and able to withstand extended exposure to sunlight and rain.

ALB-20 Multipurpose Snap Hook

- Quick-release, stable wearing.
- Bottle opener.
- Straight screwdriver.
- Non-magnetizable.
- Size: 2.12" x 1.13" x 0.14" / 53.8 x 28.6 x 3.5 mm.
- Weight: 0.32 oz / 9 g.
- Material: Titanium alloy TC4.

NEW

ALD-05 Flashlight Helmet Holder

- Anti-static rubber fixing strap, compatible with all types of helmets.
- Adjustable clamping caliber - suitable for flashlights with an outer body diameter of 20-28mm.
- 360° adjustable angle.

ALD-08 Bicycle Light Helmet Holder

Applicable to BC21R V2.0, BC25R, BC30R, BC35R, BC30, BC30 V2.0.

- The fitted cable ties are applicable to a variety of bicycle helmets.
- Push and pull for one-second assembly and disassembly.
- Nylon and fiberglass - high toughness, strength and durability.
- Weight: 0.39 oz / 11 g.
- Size: 2.87" x 2.20" x 0.55" / 73 x 56 x 14 mm.

ALD-10 Bicycle Light Holder with GoPro Interface

The holder is lightweight, and the bicycle light can be easily fixed with a single push. It is applicable to all Fenix bicycle lights.

- International GoPro interface.
- Easy assembly.
- Compact and lightweight.
- Stable and reliable.

ALG-03 V2.0 Headlamp Attachment

ALG-03 V2.0 headlamp attachment is specifically designed for headlamp fixation to outdoor or industrial work helmets. It enables fast and convenient attachment and detachment of headlamps to and from the helmet and allows adjustment of the lighting angle of the headlamps.

- Made of quality nylon - durable and eco-friendly.
- Included TESA adhesive tapes.

ALL-01 Soft Flashlight Lanyard

ALL-01 is a flashlight lanyard made of nylon and silicone sleeves. The length of the nylon cord and the silicone sleeves can be adjusted as needed. This flashlight lanyard is very comfortable to the hands and features non-slip as well.

- Applicable products: SD11, SD20, TK47UE, TK47, TK72R, TK75, RC40.
- Size: 0.35" Tube diameter x 9.25" Length (9 x 235 mm).
- Weight: 0.42 oz / 12 g.

NEW

ALW-01 Wrist Flashlight Holder

The Fenix ALW-01 wrist flashlight holder is a wearable helper that is designed to hold a small flashlight with a body clip on your arm or your wrist. Constructed from durable PC material, the 360° adjustable flashlight holder is flexible for perfect hands-free illumination. The wrist strap is made of durable Nylon yarn, which is wear-resistant and comfortable to wear, and the adjustable range of the wrist strap is 140 - 200 mm. This wrist flashlight holder can be freely worn on the left or right hand.

- Body size: 2.09" x 1.77" x 0.83" / 53 x 45 x 21.2 (Length x Width x Thickness).
- Wrist strap size: 9.06 x 1.57" / 230 (±5) x 40 (±1) mm (Length x Width).
- Adjustable range of the wrist strap: 140 - 200 mm.
- Body weight: 0.56 oz / 16 g, wrist weight: 0.32 oz / 9 g; 0.88 oz / 25 g in total.

CUSTOMER SERVICE

Fenix Product Warranty Terms

15 Days Free Replacement

15 days free replacement: Fenix will replace a new product within 15 days of purchase for any manufacturing defects if problems come into being in normal use; We will replace it with the same model. If the model has been discontinued, customers will receive a product with a similar or improved model.

5 Years Free Repair

5 years free repair: Fenix will offer free repair within 5 years for lights from the date of purchase if a problem develops with normal use. Different warranty periods for different products:

Product Type	Warranty
Flashlights, tactical lights, headlamps, bicycle lights, camping lanterns (included rechargeable lights but not built-in battery)	5 years battery for 1 year
Flashlights, tactical lights, headlamps, bicycle lights, camping lanterns (with built-in battery)	2 years (battery included)
Rechargeable batteries, chargers, bike mount, and remote pressure switch	1 year

Limited Lifetime Warranty

Limited lifetime warranty: For lights past the free repair warranty period, we provide lifetime repairs but will charge for parts. The distributor will notify the customer of the cost of the part before repair.

Extended warranty service

An extra 6-month warranty period is obtained once you have successfully registered on the official website for Fenixlight Limited (www.fenixlight.com), which only applies to flashlights, tactical lights, headlamps, bike lights and camping lanterns.

Warranty Certificate

Customers requesting after-sales service from Fenix distributors or dealers, should present their completed Fenix Warranty Card, purchase invoice or receipt. The distributor should then provide service to the customer/s, and Fenix will support backup for this service.

The free warranty does not cover any damages or failure caused by:

- (1) Normal wear
- (2) Rough operation
- (3) Battery leakage
- (4) Any defects or damages caused by the improper operations include but not limited to the operation which doesn't comply with the warranty or notes shown in the product specification. For example, the product specification will describe that please don't disassemble the sealed head, as doing so can damage the flashlight and will void the warranty.
- (5) Any defects or damage led by other behaviors which can not be controlled by Fenix reasonably.

For any problems/suggestions, please email our Customer Service Department:
